Trans. of Beiträge zur Tabakforschung [sic] 1961, no. 1,
p. 19-29.

DESCRIPTORS: *Moisture, *Tobacco, Distillation,
Benzene.

The methods which are presently customary for the
determination of tobacco moisture are compared. Re-
sults of investigations follow which were obtained by
means of the distillation method with the use of various
distilling agents. Distillation with benzene under stand-
ard conditions is proposed as a standard method of
moisture determination for calibration and laboratory
(Chemistry--Analytical, TT, v. 10, no. 8) (over)

DESCRIPTORS: Aerial reconnaissance. *Ice. *Baltic:
Sea. Navigation charts. Position finding. Measurement.
Vision.

The article discusses a newly introduced semi-instru-
mental method of observations on sea and continental
ice from aircraft by the use of an aerial angle-
measuring perspectograph (perspective measuring
instrument). The method was successfully used during
(Earth Sciences--Oceanography, TT, v. 9, no. 11)(over)
